17-18 Pep Tune List

Green songs are new songs this year and are probably replacing something else in the packet.

Please put your pep band flip folder in the following order. All songs are numbered and in your packet. If you are missing anything look through your packet and cut out what you need and put it in your flip folder.

Make sure you don't overlap unless indicated. You will need 26 windows. Use the front sides for the first 26 songs and the back side for the last 27 songs. Do not put song on one side and song 2 on the back. Your flip folder will be dysfunctional that way. If you are missing songs, please leave the slot open and make sure to get a copy. Number the songs before you cut them and put them in your folder (large and in highlighter so you can quickly find them). Doing this completely and correctly will make pep band much easier for you!!! If in doubt ask for help.

Trumpet players put both parts in the same window so we are always covered for parts.

Baritones – make sure you look for the part in the right clef that you read. Both parts are in your packet.

Bass clarinets should also have a tenor sax pack for any parts they are missing from the bass clarinet pack.
