

### **Photo/Video Publication**

Photo/Video Release Photos and videos may appear in various District materials, including school and district websites, social media websites, newsletters, brochures, advertising, etc. Student names are usually not used in association with photos and videos, but when they are, only first names will be used except in situations where full names are standard. Most parents/guardians support and encourage this celebration of achievements, so by default all parents/guardians who register their students are giving permission for this use. If you have a particular concern about this, please talk with your child's principal so alternate arrangements can be made, if needed.
